

PERSONALIZED LEARNING CERTIFICATIONS

AREA9 U™ BASIC LEARNING ENGINEER

The certification program for an Area9 U™ Basic Learning Engineer enables clients, partners, and contractors to curate and create adaptive learning content. Successful certification demonstrates your ability to build a basic module with learning objectives, probes and learning resources at a high level of design and learning quality.

GOALS

- ✓ Engineer learning objectives, probes, and resources at a granular level and prepare that content for deployment in an AI-driven adaptive learning platform.
- ✓ Develop proficiency with using Rhapsode CURATOR™ to prioritize objectives, select appropriate probes, and curate the learning resources best suited to those objectives.
- ✓ Gain the hands-on experience you will need to independently create adaptive content, evaluate quality, and deploy it in your organization. The capstone project of your certification for Area9 U™ Basic Learning Engineer will be a usable module with approximately 20 learning objectives, probes, and learning resources that you can deploy in your organization.

OVERVIEW

The curriculum for the Area9 U™ Basic Learning Engineer consists of 5 assignments covering the theory and practice behind learning engineering in Rhapsode CURATOR™. With a combination of self-study, hands-on work, and mentoring from an experienced Area9 Lyceum Learning Engineer, you will become an expert in developing your own adaptive courses and will get an understanding of how you can create and maintain an excellent learning experience in your organization.
